Table guide

Workbenches for industries and workplaces

WFI

We work for others to work smarter

WFI develops and sells workplace solutions that improve the flow and success of companies. By providing a concept of workstation solutions with focus on industrial and warehouse benches, we help companies create more efficient flows, pack more packages, and handle more goods. Simply work smarter!

We are located in Gnosjö, Sweden, as is our range of more than 1 000 products in stock. This is also where all development takes place and where most of our products are manufactured.

WFI

Why table guide?

We want to make it easier for others to work smarter. Therefore, we have produced an overview of our manual and motorized workbenches, for you to be able to choose the right table based on your needs. Simply a table guide! Smart right?

WFI

Follow the guide like this!

The guide takes you through all our tables in order of size – from manual to motorized and from the most flexible to the heaviest. In the top corner, you can see what load capacity the table has, followed by a specification of dimensions, materials, and standard designs. As well as what can be mounted over and under the table. All motorized workbenches have a QR code with a direct link to an assembly video!

1-802-136 m.fl.

Build your own table in The Yelper!

In our configurator, The Yelper, you can build a unique workplace solution directly online. Start by choosing a table based on this guide and then, add accessories which makes your workflow more efficient. Everything in a 3D view with a drag and drop function, price information, and the ability to send a quotation request. Existing customers see their specific prices in The Yelper when logged in.

Try to **build your unique table** directly
by scanning the QR code:

A grayscale photograph of a warehouse interior. On the left, a man in a dark hoodie and pants is standing next to a metal shelving unit, handling a cardboard box. The shelving unit is filled with many cardboard boxes. In the center, there is a blue metal cart with a single box on it. To the right, there is a workbench with a printer, a computer monitor, and various tools and supplies. The background shows large windows and the structural elements of the warehouse.
